

1. Over the last 30 years I've worked with multi-million-dollar budgets by distributing the proper amount of funds into the accounts where they are needed most and where they would be more beneficial. My determination in a good budget will be to make sure it's not wasted in places where it is not needed and to utilize the funds to the most useful needs
2. I will enlist support to renew bonds. It is a must and I feel that the only way to attract any non-children voters or conservatives is simple; with positive results directly impacting the betterment of our children, staff, and schools. The school board can prove itself accountable by good housekeeping and worthy spending and avoid any fraudulent activity.
3. In the last 5 years, the district has shown positive results for Marthaville school. It has a healthy supply of funds and a great staff with lots of wonderful children. The children and staff enjoy showing up to school on a daily basis; which lets us know that the atmosphere is welcoming as well. The district has done a poor job budgeting/allocating funds over the past few years. There should be accountability from outside sources with results.
4. My plan is to meet with all of the teachers and staff to learn their needs of concern and take into consideration that all schools have different needs.
5. As I stated above, I would guide them to follow the chain of command. It should be used to address any and all issues. But, as I've stated during my campaign, I will not promise anything except to be the voice of the people, children and staff.
6. I do believe these can be achievable goals, but I also believe that it all starts and ends at the home, if we want to see these results, we have to have more parental involvement.

My Goals/Agenda

1. Safety/Bullying students/Staff
2. Health (meals/physical education/atmosphere)
3. All teachers treated fairly
 - a. To restructure the grading system (10 point grading scale)
 - b. The system used for teachers evaluations
4. Funding access for all schools to have multiple electives to choose from
5. To have a high school in the west area of the parish
 - a. To eliminate the overcrowding that currently exists to eliminate stress and pressure from teachers and students
6. To consolidate or eliminate funds for clubs/organizations to help ease the burden of the beginning of the year expenses
 - a. Only the wealthy get to participate in certain activities because of costs
 - b. All children have the right to be involved
